

## Santa Rita Landscaping Wins State Awards

The Arizona Landscape Contractors' Association recently honored Santa Rita Landscaping for its commercial maintenance of the Unisource/TEP building in downtown Tucson.

The Award of Distinction for Commercial Maintenance under \$25,000 was one of four top honors the landscaping company received at the annual awards held in Phoenix in November.

The ALCA awards recognize projects designed and constructed in Arizona by professional contractors that achieve the highest landscape quality, provide unique solutions to landscape problems, conserve natural resources and enhance the environment.

The Unisource/TEP building is a unique building that complements the revamped downtown, a Santa Rita press release said. "From the custom raised rustic planter beds to the liner run of ocotillos, the lush native plant pallet brings a striking image which ties into the theme of the building," the release said.

"Each section of the building has its own landscape setting that complements the uniqueness of its surrounding. Our objective is to continue to manage the landscape areas for this building with only the highest standards to bring out the intrinsic beauty while protecting the investment of the landscape environment for years to come."
